## CRADLE TO CRADLE

REMAKING THE WAY WE MAKE THINGS

BY WILLIAM MCDONOUGH & MICHAEL BRAUNGART

Cradle To Cradle could maybe considered the Bible of new environmentalism. Written by leading Green Architect William McDonough and Chemist Michael Braungart, this book takes a serious look at how we make things and where it goes when we're down with them. The book itself is made out of high quality plastic resins and inorganic fillers that make the book nearly indestructible and able to be "up cycled" rather than "down cycled" like most papers. William McDonough designs factories for companies like Ford and is in the process of designing huge Green Cities for China. He is truly a leader in this current green revolution.
